Quote:(Full) Ante-face: Middle and lower face that protrudes forward to a great extent (e. g. Angelina Jolie), corresponding to our ideal of absolute beauty.

<http://www.sailerclinic.com/en/fachwoert...chnis.html>

(full ante face on the left)

Fig. 3. An overview of the different profile types for the female model. The straight average profile is the median and has a value on the VAS of 50.

S. Mees et al. / Journal of Cranio-Maxillo-Facial Surgery xxx (2013) 1–9

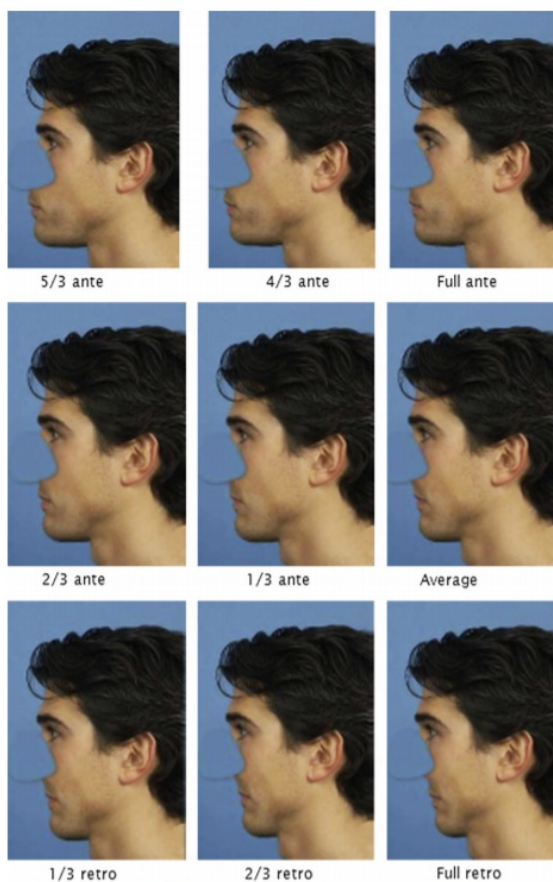

Fig. 4. An overview of the different profile types for the male model. The straight average profile is the median and has a value on the VAS of 50.

<http://www.mauricemommaerts.eu/files/PDF...771600.pdf>
(Overview about the different profile types)

The term ante face was coined by the surgeon Prof. Sailer who also offers procedures to achieve an full ante face (maxillomandibular advancement). While its indisputable that an full ante face looks better from the profile view its still controversial whether it makes a real difference from the front view.

Any kind of retro face looks aesthetical unappealing both from the front view and from the profile view.

In order to see how whether you got a full ante face its necessary to take a profile shot in natural head position. if your Middle and lower face is beyond the so called Gonzalez-Ulloa line youve got an full anteface.

(Gonzalez-Ulloa line =vertical line dropped from soft tissue nasion, perpendicular to the Frankfort horizontal plane)

(Frankfort horizontal plane is defined clinically as a line connecting the tragon (the notch in the superior margin of each tragus) and orbitale (the lowest palpable point on the inferior orbital rim))

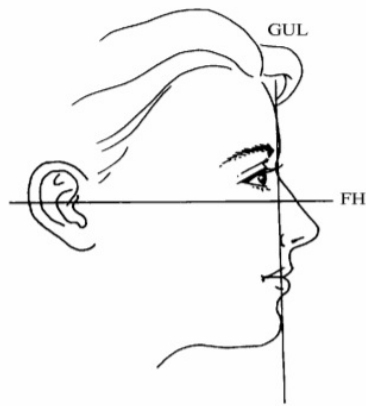

Abbildung 4: O-Meridian Linie nach Gonzalez-Ulloa FH= Frankfurter Horizontale, GUL= Gonzalez-Ulloa Linie

(aus E. Steinhäuser, Proportionen des ästhetischen Gesichtes im Vergleich zur bildenden Kunst, Fortschr Kiefer und Gesichtschir, Bd 34, Thieme Stuttgart, 1989)

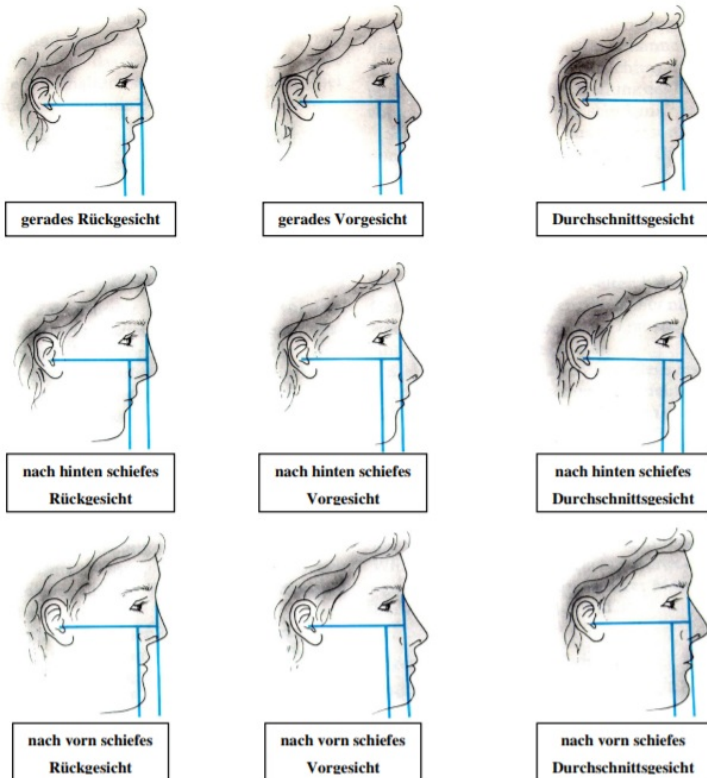

Abbildung 5: Kieferprofilfeld nach A.M. SCHWARZ

(modifiziert aus Lehrgang der Gebissregelung, Bd I, Urban & Schwarzenberg Wien-Innsbruck

1951)

There are ethnic differences. Most caucasian people dont have an full ante face. it is more common under black and asian people.

(06-30-2015, 09:22 PM)Polysynthetic Sumatran Orangutan Wrote: Ante-face is overrated in my opinion, in some it can look great, but it's not a prerequisite.

Anyway, here are the profiles of Emilia Clarke, Scarlett Johansson, Brooke Shields & Angelina Jolie. Some of the most beautiful Women in the world.

clark has an full anteface. her maxilla and mandibular are beyond the Gonzalez-Ulloa line.

My profile looks like the woman on the left. Isn't she lifting her face up though?

Yeah, she's tilting her head up, and it's not a true profile shot.

I always wanted a bigger, more projected forehead because it's a neotenous/pedomorphic feature. Could I be wrong about that being attractive?

yeah im not falling for that.

anyway that girl you posted has an anteface. i dont know whethter a projecting forehead is an attractive feature. her mandibular or chin is retruded.

Rectroagthic profiles are ideal for women

The sub-8 law refers to systematic legal oppression of non-attractive men (more specifically, men rated below 8 in attractiveness).

Retroagthic profiles are ideal for women

According to science retro profiles are always inferior. Ideally the maxilla and mandible should be about 1cm in front of the forehead. A mild ante face is ideal on everyone male or female. It's the ideal profile.

Show me a maxilla that's 1 cm anterior than the supraorbital ridge please. Upper lip only maybe and of course nose, but those things aren't maxilla.

it's clear the woman on the left's head is rotated out slightly and tilted up. not a true profile shot, bad comparison.

it is not clear. her face has grown like that: rotated and tilted up.

right woman's posture is exactly the same. you can't make her tilt up even more.
